

THE FUTURE OF IMMUNIZATION INFORMATION SYSTEMS HAS ARRIVED.

User-Friendly | Intuitive | Smart | Modern | Low-Stress Data Migration

ALL modern IIS functionality, including:

- Supports HL7, FHIR, and other data exchange formats
- Seamless data exchange with any IIS, EHR, or HIE
- Simplified data migration
- In-App Guidance to minimize training needs
- Artificial Intelligence (AI) learns and acts on use patterns
- Mass Vaccination Registration and Documentation
- Provider Enrollment and Ordering
- Barcode reader to improve accuracy
- IQIP
- Intuitive design to reduce manual data-entry
- Provider report cards
- Built-In data integrity and accuracy reports
- Store test results and other information
- Speedy customizations and enhancements

ALL features of OptimIIS, PLUS:

- End-to-End Pandemic Preparedness Module
- Complete Mass Vaccination App
- Consumer Access Portal containing all types of vaccinations
- School-Located Vaccination Planning Module
- Community-Located Vaccination Module
- Provider “Microsites” to support vaccine ordering and tracking

POWERED BY PREPMOD™

- Nearly 20 million records processed
- Trusted by more than 70,000 log-in users
- 2018 Flu Summit Award Winner
- SOC2-certified and HIPAA-Compliant
- Proven 98.7% accuracy in data quality
